

SE200 | **Compatibility Notice**

Text To Speech Technology

The Black Diamond SE200 can announce the name of an incoming caller which requires the transfer of the mobile phones address book to the Black Diamond SE200.

The transfer of the mobile phones address book to the Black Diamond SE200 is dependant on support of the transfer protocol by the mobile phone.

If the mobile phones address book is not available to the Black Diamond SE200, the SE200 will announce the incoming callers phone number rather than name.

All other spoken status announcements remain unaffected.

The transfer of the address book is not supported by all mobile handsets.

The Apple iPhone does not support address book transfer to the SE200.
